

# HOME BUILDING 1-DAY WORKSHOP

**9.30am – 4.00pm Sat 15th October 2011**

*“Perfect for you if you are planning to build your own energy efficient healthy home.”*

The one day course is designed to explore the key components that go into a Passive House and how they work together. Once you have completed this workshop you will be able to understand the technology, why it works and benefits that you will enjoy living in a Passive House.

This workshop will be a huge step towards you saving thousands of dollars and ensure that you are part of the movement of change endeavouring to ensure that New Zealand stays “clean and green” for future generations.

The learning environment will be perfect as the workshops are held in the eHaus at 5 Webster Place Wanganui.

The cost for the day is \$145 Single & \$185 Couple, which includes lunch and refreshments.

**Places limited so register today**

## Previous workshop feedback

*"The material was interesting and relevant."*

*"Presentation material was good, and the openness to share useful information was really appreciated."*

*"I came away with a much better understanding of the direction I will take in my next house design. My questions were answered and the politeness and hospitality that you provided was brilliant."*
